

All Terrain Knee Walker

Description

SAFE CRUTCH ALTERNATIVE

Providing safe, stability mobility, the knee walker is a great alternative to crutches while recovering from a foot, leg or knee injury or surgery

DUAL BRAKING SYSTEM

Safely navigate any surface, including inclines, with responsive dual rear brakes for exceptional stability and control

CONTOURED KNEE PLATFORM

The knee platform is contoured to safely cradle the leg and eliminate painful pressure points, chafing and irritation

LARGE ALL TERRAIN TIRES

Four 12" pneumatic tires allow you to easily navigate any surface indoors and out, including loose surfaces such as gravel or grass

HEIGHT ADJUSTABLE DESIGN

Easily adjust the height of both the handlebars and the knee platform for a comfortable, customized fit

FOLDABLE STEEL FRAME

Safely supporting up to 300 pounds, the steel frame knee walker easily folds for compact storage and travel
